Contents

Volume 177 No. 1 January 1, 1993

1 ***Marc Dupuis, Esther Schaerer, Karl-Heinz Krause, and Jürg Tschopp.*** The calcium-binding protein calreticulin is a major constituent of lytic granules in cytolytic T lymphocytes

9 ***William T. Golde, Thomas R. Burkot, Steven Sviat, Mark G. Keen, Leonard W. Mayer, Barbara J. B. Johnson, and Joseph Piesman.*** The major histocompatibility complex–restricted response of recombinant inbred strains of mice to natural tick transmission of *Borrelia burgdorferi*

19 ***María J. Sánchez, José C. Gutiérrez-Ramos, Edgar Fernández, Esther Leonardo, Juanjo Lozano, Carlos Martínez-A., and María L. Toribio.*** Putative prethymic T cell precursors within the early human embryonic liver: a molecular and functional analysis

35 ***John A. Goss, Robert Pyo, M. Wayne Flye, Janet M. Connolly, and Ted H. Hansen.*** Major histocompatibility complex–specific prolongation of murine skin and cardiac allograft survival after in vivo depletion of $V\beta^+$ T cells

45 ***Jürgen Roes and Klaus Rajewsky.*** Immunoglobulin D (IgD)-deficient mice reveal an auxiliary receptor function for IgD in antigen-mediated recruitment of B cells

57 ***Jody L. Baron, Joseph A. Madri, Nancy H. Ruddle, George Hashim, and Charles A. Janeway, Jr.*** Surface expression of $\alpha 4$ integrin by CD4 T cells is required for their entry into brain parenchyma

69 ***Elizabeth A. Reap, Eric S. Sobel, Philip L. Cohen, and Robert A. Eisenberg.*** Conventional B cells, not B-1 cells, are responsible for producing autoantibodies in *lpr* mice

79 ***Yves Lobet, Christiane Feron, Guy Dequesne, Etienne Simoen, Pierre Hauser, and Camille Locht.*** Site-specific alterations in the B oligomer that affect receptor-binding activities and mitogenicity of pertussis toxin

89 ***H. Shaw Warren, Stephen F. Amato, Catherine Fitting, Kerry M. Black, Paul M. Loiselle, Mark S. Pasternack, and Jean-Marc Cavaillon.*** Assessment of ability of murine and human anti–lipid A monoclonal antibodies to bind and neutralize lipopolysaccharide

99 ***Nienke van der Stoep, Joke van der Linden, and Ton Logtenberg.*** Molecular evolution of the human immunoglobulin E response: high incidence of shared mutations and clonal relatedness among ϵ V_H5 transcripts from three unrelated patients with atopic dermatitis

109 ***Helen Tighe, Pojen P. Chen, Rebecca Tucker, Thomas J. Kipps, Jean Roudier, Frank R. Jirik, and Dennis A. Carson.*** Function of B cells expressing a human immunoglobulin M rheumatoid factor autoantibody in transgenic mice

119 ***Janice White, Ann Pullen, Kyunghee Choi, Philippa Marrack, and John W. Kappler.*** Antigen recognition properties of mutant $V\beta3^+$ T cell receptors are consistent with an immunoglobulin-like structure for the receptor

127 ***Michael W. Pride, Arvind Thakur, and Yasmin Thanavala.*** Mimicry of the *a* determinant of hepatitis B surface antigen by an antiidiotypic antibody. I. Evaluation in hepatitis B surface antigen responder and nonresponder strains

135 ***Patrick Charmley, Kai Wang, Leroy Hood, and Deborah A. Nickerson.*** Identification and physical mapping of a polymorphic human T cell receptor $V\beta$ gene with a frequent null allele

145 ***Louis Schofield and Fiona Hackett.*** Signal transduction in host cells by a glycosylphosphatidylinositol toxin of malaria parasites

155 ***Kazuyoshi Takeda and Gunther Dennert.*** The development of autoimmunity in C57BL/6 *lpr* mice correlates with the disappearance of natural killer type 1–positive cells: evidence for their suppresive action on bone marrow stem cell proliferation, B cell immunoglobulin secretion, and autoimmune symptoms

165 ***Patrick Tan, Claudio Anasetti, John A. Hansen, Jennifer Melrose, Mark Brunvand, Jeff Bradshaw, Jeffrey A. Ledbetter, and Peter S. Linsley.*** Induction of alloantigen-specific hyporesponsiveness in human T lymphocytes by blocking interaction of CD28 with its natural ligand B7/BB1

175 ***Keith R. Hudson, Helen Robinson, and John D. Fraser.*** Two adjacent residues in staphylococcal enterotoxins A and E determine T cell receptor Vβ specificity

Brief Definitive Reports

185 ***Yvette van Kooyk, Elly van de Wiel-van Kemenade, Pauline Weder, Richard J. F. Huijbens, and Carl G. Figdor.*** Lymphocyte function–associated antigen 1 dominates very late antigen 4 in binding of activated T cells to endothelium

191 ***Donald E. Mosier, K. Lynn Stell, Richard J. Gulizia, Bruce E. Torbett, and Gary L. Gilmore.*** Homozygous *scid/scid;beige/beige* mice have low levels of spontaneous or neonatal T cell–induced B cell generation

195 ***Eric Rouvier, Marie-Françoise Luciani, and Pierre Golstein.*** Fas involvement in Ca^{2+}-independent T cell–mediated cytotoxicity

201 ***Lars Franksson, Erik George, Simon Powis, Geoffrey Butcher, Jonathan Howard, and Klas Kärre.*** Tumorigenicity conferred to lymphoma mutant by major histocompatibility complex–encoded transporter gene

207 ***Elizabeth Ennis, Ralph R. Isberg, and Yoji Shimizu.*** Very late antigen 4–dependent adhesion and costimulation of resting human T cells by the bacterial β1 integrin ligand invasin

213 ***Michael Buschle, Dario Campana, Simon R. Carding, Carlos Richard, A. Victor Hoffbrand, and Malcolm K. Brenner.*** Interferon γ inhibits apoptotic cell death in B cell chronic lymphocytic leukemia

219 ***SiowFong Wee, Gary L. Schieven, Jean M. Kirihara, Theta T. Tsu, Jeffrey A. Ledbetter, and Alejandro Aruffo.*** Tyrosine phosphorylation of CD6 by stimulation of CD3: augmentation by the CD4 and CD2 coreceptors

225 ***S. M. Wahl, J. B. Allen, G. L. Costa, H. L. Wong, and J. R. Dasch.*** Reversal of acute and chronic synovial inflammation by anti–transforming growth factor β

231 ***Marja Jäättelä and Dorte Wissing.*** Heat-shock proteins protect cells from monocyte cytotoxicity: possible mechanism of self-protection

237 ***Susan K. Begg, John M. Radley, Jeffrey W. Pollard, Orin T. Chisholm, E. Richard Stanley, and Ivan Bertoncello.*** Delayed hematopoietic development in osteopetrotic (*op/op*) mice

243 ***Marie-José Truong, Valérie Gruart, Jean-Pierre Kusnierz, Jean-Paul Papin, Sylvie Loiseau, André Capron, and Monique Capron.*** Human neutrophils express imunoglobulin E (IgE)-binding proteins (Mac-2/εBP) of the S-type lectin family: roles in IgE-dependent activation

Volume 177 No. 2 February 1, 1993

249 ***Andrew Carmichael, Xia Jin, Patrick Sissons, and Leszek Borysiewicz.*** Quantitative analysis of the human immunodeficiency virus type 1 (HIV-1)-specific cytotoxic T lymphocyte (CTL) response at different stages of HIV-1 infection: differential CTL responses to HIV-1 and Epstein-Barr virus in late disease

257 ***Dominique Dunon, Max D. Cooper, and Beat A. Imhof.*** Thymic origin of embryonic intestinal γ/δ T cells

265 ***Nicholas P. Restifo, Fernando Esquivel, Yutaka Kawakami, Jonathan W. Yewdell, James J. Mulé, Steven A. Rosenberg, and Jack R. Bennink.*** Identification of human cancers deficient in antigen processing

273 ***Zheng Feng, R. Nicholas Hoffmann, Ruth S. Nussenzweig, Moriya Tsuji, Hisashi Fujioka, Masamichi Aikawa, Ton H. W. Lensen, Thivi Ponnudurai, and Laura G. Pologe.*** Pfs2400 can mediate antibody-dependent malaria transmission inhibition and may be the *Plasmodium falciparum* 11.1 gene product

283 ***Joseph A. Mollick, Richard L. McMasters, Douglas Grossman, and Robert R. Rich.*** Localization of a site on bacterial superantigens that determines T cell receptor β chain specificity

295 ***Nicholas Burdin, Catherine Péronne, Jacques Banchereau, and Françoise Rousset.*** Epstein-Barr virus transformation induces B lymphocytes to produce human interleukin 10

305 ***Benjamin E. Rich, Juanita Campos-Torres, Robert I. Tepper, Randall W. Moreadith, and Philip Leder.*** Cutaneous lymphoproliferation and lymphomas in interleukin 7 transgenic mice

317 ***Sharon R. Nahill and Raymond M. Welsh.*** High frequency of cross-reactive cytotoxic T lymphocytes elicited during the virus-induced polyclonal cytotoxic T lymphocyte response

329 ***Akhilesh Pandey, Larry W. Tjoelker, and Craig B. Thompson.*** Restricted immunoglobulin junctional diversity in neonatal B cells results from developmental selection rather than homology-based V(D)J joining

339 ***E. M. Deacon, G. Pallesen, G. Niedobitek, J. Crocker, L. Brooks, A. B. Rickinson, and L. S. Young.*** Epstein-Barr virus and Hodgkin's disease: transcriptional analysis of virus latency in the malignant cells

351 ***Natesan Mohan, David Mottershead, Meena Subramanyam, Ulrich Beutner, and Brigitte T. Huber.*** Production and characterization of an Mls-1-specific monoclonal antibody

359 ***Werner Held, Alexander N. Shakhov, Shozo Izui, Gary A. Waanders, Leonardo Scarpellino, H. Robson MacDonald, and Hans Acha-Orbea.*** Superantigen-reactive $CD4^+$ T cells after infection with mouse mammary tumor virus

367 ***Hiroshi Kosaka and Jonathan Sprent.*** Tolerance of $CD8^+$ T cells developing in parent $\rightarrow F_1$ chimeras prepared with supralethal irradiation: step-wise induction of tolerance in the intrathymic and extrathymic environments

379 ***Charles D. Surh, Jonathan Sprent, and Susan R. Webb.*** Exclusion of circulating T cells from the thymus does not apply in the neonatal period

387 ***Gamal E. Osman, Masaaki Toda, Osami Kanagawa, and Leroy E. Hood.*** Characterization of the T cell receptor repertoire causing collagen arthritis in mice

397 ***Patrick G. Holt, Jane Oliver, Natalie Bilyk, Christine McMenamin, Paul G. McMenamin, Georg Kraal, and Theo Thepen.*** Downregulation of the antigen presenting cell function(s) of pulmonary dendritic cells in vivo by resident alveolar macrophages

409 ***A. K. Stewart, C. Huang, B. D. Stollar, and R. S. Schwartz.*** High-frequency representation of a single V_H gene in the expressed human B cell repertoire

419 ***A. Razzaque Ahmed, Aloke Mohimen, Edmond J. Yunis, Nadeem M. Mirza, Vijay Kumar, Ernst H. Beutner, and Chester A. Alper.*** Linkage of pemphigus vulgaris antibody to the major histocompatibility complex in healthy relatives of patients

425 ***Kai W. Wucherpfennig, Y. Joyce Liao, Margaret Prendergast, John Prendergast, David A. Hafler, and Jack L. Strominger.*** Human fetal liver γ/δ T cells predominantly use unusual rearrangements of the T cell receptor δ and γ loci expressed on both $CD4^+CD8^-$ and $CD4^-CD8^-$ γ/δ T cells

433 ***David L. Woodland, Hedy P. Smith, Sherri Surman, Phuong Le, Renren Wen, and Marcia A. Blackman.*** Major histocompatibility complex–specific recognition of Mls-1 is mediated by multiple elements of the T cell receptor

443 ***S. Seiter, R. Arch, S. Reber, D. Komitowski, M. Hofmann, H. Ponta, P. Herrlich, S. Matzku, and M. Zöller.*** Prevention of tumor metastasis formation by anti–variant CD44

457 ***Harold J. Burstein and Abul K. Abbas.*** In vivo role of interleukin 4 in T cell tolerance induced by aqueous protein antigen

465 ***Lain C. Pontes de Carvalho, Stephen Tomlinson, Filip Vandekerckhove, E. Jay Bienen, Allen B. Clarkson, Man-Shiow Jiang, Gerald W. Hart, and Victor Nussenzweig.*** Characterization of a novel trans-sialidase of *Trypanosoma brucei* procyclic trypomastigotes and identification of procyclin as the main sialic acid acceptor

475 ***Simon R. Carding, William Allan, Anthony McMickle, and Peter C. Doherty.*** Activation of cytokine genes in T cells during primary and secondary murine influenza pneumonia

483 ***Hedy Teppler, Gilla Kaplan, Kendall A. Smith, Antonia L. Montana, Peter Meyn, and Zanvil A. Cohn.*** Prolonged immunostimulatory effect of low-dose polyethylene glycol interleukin 2 in patients with human immunodeficiency virus type 1 infection

493 ***Jeongwon Sohn, Rachel M. Gerstein, Chih-Lin Hsieh, Matthew Lemer, and Erik Selsing.*** Somatic hypermutation of an immunoglobulin μ heavy chain transgene

Brief Definitive Reports

505 ***Patrick E. Duffy, Paulo Pimenta, and David C. Kaslow.*** Pgs28 belongs to a family of epidermal growth factor–like antigens that are targets of malaria transmission–blocking antibodies

511 ***Xiaoke Zhang and David C. Morrison.*** Lipopolysaccharide-induced selective priming effects on tumor necrosis factor α and nitric oxide production in mouse peritoneal macrophages

517 ***Minoru Takahashi, Junji Takeda, Shinichi Hirose, Robert Hyman, Norimitsu Inoue, Toshio Miyata, Etsuko Ueda, Teruo Kitani, M. Edward Medof, and Taroh Kinoshita.*** Deficient biosynthesis of *N*-acetylglucosaminyl-phosphatidylinositol, the first intermediate of glycosyl phosphatidylinositol anchor biosynthesis, in cell lines established from patients with paroxysmal nocturnal hemoglobinuria

523 ***Pascale Chomarat, Marie-Clotilde Rissoan, Jacques Banchereau, and Pierre Miossec.*** Interferon γ inhibits interleukin 10 production by monocytes

529 ***Steven Greenberg, Peter Chang, and Samuel C. Silverstein.*** Tyrosine phosphorylation is required for Fc receptor–mediated phagocytosis in mouse macrophages

535 ***Margo C. Honeyman, David S. Cram, and Leonard C. Harrison.*** Glutamic acid decarboxylase 67–reactive T cells: a marker of insulin-dependent diabetes

541 ***Jung-Hyun Park, Rita Mitnacht, Nora Torres-Nagel, and Thomas Hünig.*** T cell receptor ligation induces interleukin (IL) 2R β chain expression in rat CD4,8 double positive thymocytes, initiating an IL-2–dependent differentiation pathway of CD8α^+/β^- T cells

547 ***Catherine Gérard, Catherine Bruyns, Arnaud Marchant, Daniel Abramowicz, Peter Vandenabeele, Anne Delvaux, Walter Fiers, Michel Goldman, and Thierry Velu.*** Interleukin 10 reduces the release of tumor necrosis factor and prevents lethality in experimental endotoxemia

551 ***Patrick Durez, Daniel Abramowicz, Catherine Gérard, Marcelle Van Mechelen, Zoulikka Amraoui, Christine Dubois, Oberdan Leo, Thierry Velu, and Michel Goldman.*** In vivo induction of interleukin 10 by anti-CD3 monoclonal antibody or bacterial lipopolysaccharide: differential modulation by cyclosporin A

557 ***A. G. Wilson, N. de Vries, F. Pociot, F. S. di Giovine, L. B. A. van der Putte, and G. W. Duff.*** An allelic polymorphism within the human tumor necrosis factor α promoter region is strongly associated with HLA A1, B8, and DR3 alleles

561 ***V. B. Weg, T. J. Williams, R. R. Lobb, and S. Nourshargh.*** A monoclonal antibody recognizing very late activation antigen-4 inhibits eosinophil accumulation in vivo

567 ***Mark J. Mamula.*** The inability to process a self-peptide allows autoreactive T cells to escape tolerance

573 ***Itsuo Iwamoto, Hiroshi Nakajima, Hideharu Endo, and Sho Yoshida.*** Interferon γ regulates antigen-induced eosinophil recruitment into the mouse airways by inhibiting the infiltration of $CD4^+$ T cells

577 ***Correction***

Volume 177 No. 3 March 1, 1993

583 ***Paola Romagnoli, Corine Layet, Jonathan Yewdell, Oddmund Bakke, and Ronald N. Germain.*** Relationship between invariant chain expression and major histocompatibility complex class II transport into early and late endocytic compartments

597 ***Matthew J. A. Wood, Duncan J. Sloan, Margaret J. Dallman, and Harry M. Charlton.*** Specific tolerance to neural allografts induced with an antibody to the interleukin 2 receptor

605 ***Thomas Brunner, Christoph H. Heusser, and Clemens A. Dahinden.*** Human peripheral blood basophils primed by interleukin 3 (IL-3) produce IL-4 in response to immunoglobulin E receptor stimulation

613 ***Susana Rojo, Fernando García, José A. Villadangos, and José A. López de Castro.*** Changes in the repertoire of peptides bound to HLA-B27 subtypes and to site-specific mutants inside and outside pocket B

621 ***Yasumichi Hitoshi, Yoshiaki Okada, Eiichiro Sonoda, Akira Tominaga, Masahiko Makino, Kenji Suzuki, Jun Kinoshita, Katsutoshi Komuro, Toshiaki Mizuochi, and Kiyoshi Takatsu.*** Delayed progression of a murine retrovirus-induced acquired immunodeficiency syndrome in X-linked immunodeficient mice

627 ***Deborah Fowell and Don Mason.*** Evidence that the T cell repertoire of normal rats contains cells with the potential to cause diabetes. Characterization of the $CD4^+$ T cell subset that inhibits this autoimmune potential

637 ***C. Shirley Lin, Robert C. Boltz, Joseph T. Blake, Mai Nguyen, Althea Talento, Paul A. Fischer, Martin S. Springer, Nolan H. Sigal, Robert S. Slaughter, Maria L. Garcia, Gregory J. Kaczorowski, and Gloria C. Koo.*** Voltage-gated potassium channels regulate calcium-dependent pathways involved in human T lymphocyte activation

647 ***Mina D. Marmor, Tania Benatar, and Michael J. H. Ratcliffe.*** Retroviral transformation in vitro of chicken T cells expressing either α/β or γ/δ T cell receptors by reticuloendotheliosis virus strain T

657 ***Truus W. De Graaf, Marleen E. Van der Stelt, Mariëtte G. Anbergen, and Willem van Dijk.*** Inflammation-induced expression of sialyl Lewis X–containing glycan structures on α_1-acid glycoprotein (orosomucoid) in human sera

667 ***Kazuhiro Nishikawa, Ya-Jun Guo, Masayuki Miyasaka, Takuya Tamatani, A. Bernard Collins, Man-Sun Sy, Robert T. McCluskey, and Giuseppe Andres.*** Antibodies to intercellular adhesion molecule 1/lymphocyte function-associated antigen 1 prevent crescent formation in rat autoimmune glomerulonephritis.

679 ***Franca Ronchese and Barbara Hausmann.*** B lymphocytes in vivo fail to prime naive T cells but can stimulate antigen-experienced T lymphocytes

691 ***Antonio Celada, Scott McKercher, and Richard A. Maki.*** Repression of major histocompatibility complex IA expression by glucocorticoids: the glucocorticoid receptor inhibits the DNA binding of the X box DNA binding protein

699 ***Ji Ming Wang, Daniel W. McVicar, Joost J. Oppenheim, and David J. Kelvin.*** Identification of RANTES receptors on human monocytic cells: competition for binding and desensitization by homologous chemotactic cytokines

707 ***Christiaan N. Levelt, Angelika Ehrfeld, and Klaus Eichmann.*** Regulation of thymocyte development through CD3. I. Timepoint of ligation of CD3ϵ determines clonal deletion or induction of developmental program

717 ***Barton F. Haynes, Larry O. Arthur, Patrice Frost, Thomas J. Matthews, Alphonse J. Langlois, Thomas J. Palker, Mary Kate Hart, Richard M. Scearce, Dawn M. Jones, Charlene McDanal, Janet Ottinger, Dani P. Bolognesi, and Kent J. Weinhold.*** Conversion of an immunogenic human immunodeficiency virus (HIV) envelope synthetic peptide to a tolerogen in chimpanzees by the fusogenic domain of HIV gp41 envelope protein

729 ***Jacki P. Goldman, David M. Spencer, and David H. Raulet.*** Ordered rearrangement of variable region genes of the T cell receptor γ locus correlates with transcription of the unrearranged genes

741 ***Yanto Lunardi-Iskandar, Antoine Gessain, Victor H. Lam, and Robert C. Gallo.*** Abnormal in vitro proliferation and differentiation of T cell colony–forming cells in patients with tropical spastic paraparesis/human T lymphocyte virus type I (HTLV-I)–associated myeloencephalopathy and healthy HTLV-I carriers

751 ***Gabriele Missale, Allan Redeker, John Person, Patricia Fowler, Stephane Guilhot, Hans J. Schlicht, Carlo Ferrari, and Francis V. Chisari.*** HLA-A31- and HLA-Aw68-restricted cytotoxic T cell responses to a single hepatitis B virus nucleocapsid epitope during acute viral hepatitis

763 ***Zeev Estrov, Razelle Kurzrock, Eva Pocsik, Sen Pathak, Hagop M. Kantarjian, Theodore F. Zipf, David Harris, Moshe Talpaz, and Bharat B. Aggarwal.*** Lymphotoxin is an autocrine growth factor for Epstein-Barr virus–infected B cell lines

775 ***Henry L. Wong, Gina L. Costa, Michael T. Lotze, and Sharon M. Wahl.*** Interleukin (IL) 4 differentially regulates monocyte IL-1 family gene expression and synthesis in vitro and in vivo

783 ***Paul E. Harris, Floria Lupu, Bian Hong, Elaine F. Reed, and Nicole Suciu-Foca.*** Differentiation-stage specific self-peptides bound by major histocompatibility complex class I molecules

791 ***Jun Abe, Brian L. Kotzin, Cody Meissner, Marian E. Melish, Masato Takahashi, David Fulton, François Romagne, Bernard Malissen, and Donald Y. M. Leung.*** Characterization of T cell repertoire changes in acute Kawasaki disease

797 ***Angela M. Giusti and Tim Manser.*** Hypermutation is observed only in antibody H chain V region transgenes that have recombined with endogenous immunoglobulin H DNA: implications for the location of *cis*-acting elements required for somatic mutation

811 ***Jean-Laurent Casanova, Frédéric Martinon, Hélène Gournier, Claude Barra, Christophe Pannetier, Armelle Regnault, Philippe Kourilsky, Jean-Charles Cerottini, and Janet L. Maryanski.*** T cell receptor selection by and recognition of two class I major histocompatibility complex–restricted antigenic peptides that differ at a single position

821 ***Tobias R. Kollmann, Marsha M. Goldstein, and Harris Goldstein.*** The concurrent maturation of mouse and human thymocytes in human fetal thymus implanted in NIH-beige-nude-xid mice is associated with the reconstitution of the murine immune system

Brief Definitive Reports

833 ***Geoffrey S. Kansas, Klaus Ley, J. Michael Munro, and Thomas F. Tedder.*** Regulation of leukocyte rolling and adhesion to high endothelial venules through the cytoplasmic domain of L-selectin

839 ***A. R. F. Anwar, R. Moqbel, G. M. Walsh, A. B. Kay, and A. J. Wardlaw.*** Adhesion to fibronectin prolongs eosinophil survival

845 ***Miyuki Azuma, Hans Yssel, Joseph H. Phillips, Hergen Spits, and Lewis L. Lanier.*** Functional expression of B7/BB1 on activated T lymphocytes

851 ***Gail Van Riper, Salvatore Siciliano, Paul A. Fischer, Roger Meurer, Martin S. Springer, and Hugh Rosen.*** Characterization and species distribution of high affinity GTP-coupled receptors for human Rantes and monocyte chemoattractant protein 1

857 ***Dale L. Morris and Thomas L. Rothstein.*** Abnormal transcription factor induction through the surface immunoglobulin M receptor of B-1 lymphocytes

863 ***Sachiko Miyake, Hideo Yagita, Toshiaki Maruyama, Hiroshi Hashimoto, Nobuyuki Miyasaka, and Ko Okumura.*** $\beta 1$ integrin-mediated interaction with extracellular matrix proteins regulates cytokine gene expression in synovial fluid cells of rheumatoid arthritis patients

869 ***Weisan Chen, James McCluskey, Stuart Rodda, and Francis R. Carbone.*** Changes at peptide residues buried in the major histocompatibility complex (MHC) class I binding cleft influence T cell recognition: a possible role for indirect conformational alterations in the MHC class I or bound peptide in determining T cell recognition

875 ***Correction***

Volume 177 No. 4 April 1, 1993

881 ***Maria Castedo, Lucette Pelletier, Jérôme Rossert, Régine Pasquier, Henri Villarroya, and Philippe Druet.*** Mercury-induced autoreactive anti–class II T cell line protects from experimental autoimmune encephalomyelitis by the bias of $CD8^+$ antiergotypic cells in Lewis rats

891 ***Harald von Boehmer and Katrin Hafen.*** The life span of naive α/β T cells in secondary lymphoid organs

897 ***Gerrit Koopman, Karl-Heinz Heider, Eveliene Horst, Günther R. Adolf, Frank van den Berg, Helmut Ponta, Peter Herrlich, and Steven T. Pals.*** Activated human lymphocytes and aggressive non-Hodgkin's lymphomas express a homologue of the rat metastasis-associated variant of CD44

905 ***Elisabeth Brouwer, Minke G. Huitema, Pieter A. Klok, Henk de Weerd, Jan Willem Cohen Tervaert, Jan J. Weening, and Cees G. M. Kallenberg.*** Antimyeloperoxidase-associated proliferative glomerulonephritis: an animal model

915 ***Elizabeth A. Faust, Douglas C. Saffran, Deniz Toksoz, David A. Williams, and Owen N. Witte.*** Distinctive growth requirements and gene expression patterns distinguish progenitor B cells from pre-B cells

925 ***Erik A. Ranheim and Thomas J. Kipps.*** Activated T cells induce expression of B7/BB1 on normal or leukemic B cells through a CD40-dependent signal

937 ***David E. Symer, William A. Paznekas, and Hyun S. Shin.*** A requirement for membrane-associated phospholipase A_2 in platelet cytotoxicity activated by receptors for immunoglobulin G and complement

949 ***James H. M. Simon, Chamorro Somoza, Gérard A. Schockmel, Matthew Collin, Simon J. Davis, Alan F. Williams, and William James.*** A rat CD4 mutant containing the gp120-binding site mediates human immunodeficiency virus type 1 infection

955 ***Jordan Frishman, Brooks Long, William Knospe, Stephanie Gregory, and Janet Plate.*** Genes for interleukin 7 are transcribed in leukemic cell subsets of individuals with chronic lymphocytic leukemia

965 ***Timo M. Breit, Ellen J. Mol, Ingrid L. M. Wolvers-Tettero, Wolf-Dieter Ludwig, Elisabeth R. van Wering, and Jacques J. M. van Dongen.*** Site-specific deletions involving the *tal*-1 and *sil* genes are restricted to cells of the T cell receptor α/β lineage: T cell receptor δ gene deletion mechanism affects multiple genes

979 ***Annemieke Geluk, Diënne G. Elferink, Bastiaan L. Slierendregt, Krista E. van Meijgaarden, René R. P. de Vries, Tom H. M. Ottenhoff, and Ronald E. Bontrop.*** Evolutionary conservation of major histocompatibility complex–DR/peptide/T cell interactions in primates

989 ***Andrea Anichini, Cristina Maccalli, Roberta Mortarini, Stefania Salvi, Arabella Mazzocchi, Paola Squarcina, Meenhard Herlyn, and Giorgio Parmiani.*** Melanoma cells and normal melanocytes share antigens recognized by HLA-A2–restricted cytotoxic T cell clones from melanoma patients

999 ***Denise Gay, Thomas Saunders, Sally Camper, and Martin Weigert.*** Receptor editing: an approach by autoreactive B cells to escape tolerance

1009 ***Susan L. Tiegs, David M. Russell, and David Nemazee.*** Receptor editing in self-reactive bone marrow B cells

1021 ***David J. Kittlesen, Lawrence R. Brown, Vivian L. Braciale, Joseph P. Sambrook, Mary-Jane Gething, and Thomas J. Braciale.*** Presentation of newly synthesized glycoproteins to $CD4^+$ T lymphocytes. An analysis using influenza hemagglutinin transport mutants

1031 ***Tina M. McIntyre, Dennis R. Klinman, Paul Rothman, Michelle Lugo, James R. Dasch, James J. Mond, and Clifford M. Snapper.*** Transforming growth factor β_1 selectivity stimulates immunoglobulin G2b secretion by lipopolysaccharide-activated murine B cells

1039 ***Laura Z. Rassenti and Thomas J. Kipps.*** Lack of extensive mutations in the V_H5 genes used in common B cell chronic lymphocytic leukemia

1047 ***Luigi Racioppi, Franca Ronchese, Louis A. Matis, and Ronald N. Germain.*** Peptide–major histocompatibility complex class II complexes with mixed agonist/antagonist properties provide evidence for ligand-related differences in T cell receptor–dependent intracellular signaling

1061 ***Faith B. Wells, Yoichi Tatsumi, Jeffrey A. Bluestone, Stephen M. Hedrick, James P. Allison, and Louis A. Matis.*** Phenotypic and functional analysis of positive selection in the γ/δ T cell lineage

1071 ***Zhongyun Dong, Xiaoxia Qi, and Isaiah J. Fidler.*** Tyrosine phosphorylation of mitogen-activated protein kinases is necessary for activation of murine macrophages by natural and synthetic bacterial products

1079 ***Hans-Reimer Rodewald, Katherine Awad, Philippe Moingeon, Luciano D'Adamio, Daniel Rabinowitz, Yoichi Shinkai, Frederick W. Alt, and Ellis L. Reinherz.*** FcγRII/III and CD2 expression mark distinct subpopulations of immature $CD4^-CD8^-$ murine thymocytes: in vivo developmental kinetics and T cell receptor β chain rearrangement status

1093 ***Bryan A. Irving, Andrew C. Chan, and Arthur Weiss.*** Functional characterization of a signal transducing motif present in the T cell antigen receptor ζ chain

1105 ***Jean Mukherjee, Arturo Casadevall, and Matthew D. Scharff.*** Molecular characterization of the humoral responses to *Cryptococcus neoformans* infection and glucuronoxylomannan–tetanus toxoid conjugate immunization

1117 ***Graziella Bellone, Nicholas M. Valiante, Oriane Viale, Ermanno Ciccone, Lorenzo Moretta, and Giorgio Trinchieri.*** Regulation of hematopoiesis in vitro by alloreactive natural killer cell clones

1127 ***John Connor, Rajat Bannerji, Shiro Saito, Warren Heston, William Fair, and Eli Gilboa.*** Regression of bladder tumors in mice treated with interleukin 2 gene–modified tumor cells

1135 ***Mark E. Morrison, Setaluri Vijayasaradhi, Dov Engelstein, Anthony P. Albino, and Alan N. Houghton.*** A marker for neoplastic progression of human melanocytes is a cell surface ectopeptidase

1145 ***Jonathon D. Sedgwick, Stefan Schwender, Rikke Gregersen, Rüdiger Dörries, and Volker ter Meulen.*** Resident macrophages (ramified microglia) of the adult Brown Norway rat central nervous system are constitutively major histocompatibility complex class II positive

1153 ***Adriana Bonomo and Polly Matzinger.*** Thymus epithelium induces tissue-specific tolerance

1165 ***Marko Z. Radic, Jan Erikson, Samuel Litwin, and Martin Weigert.*** B lymphocytes may escape tolerance by revising their antigen receptors.

Brief Definitive Reports

1175 ***Harald Renz, Katherine Bradley, Joachim Saloga, Joan Loader, Gary L. Larsen, and Erwin W. Gelfand.*** T cells expressing specific Vβ elements regulate immunoglobulin E production and airways responsiveness in vivo

1181 ***Felicia Gaskin, James Finley, Qiang Fang, Shihua Xu, and Shu Man Fu.*** Human antibodies reactive with β-amyloid protein in Alzheimer's disease

1187 ***Antonin R. de Fougerolles, Lloyd B. Klickstein, and Timothy A. Springer.*** Cloning and expression of intercellular adhesion molecule 3 reveals strong homology to other immunoglobulin family counter-receptors for lymphocyte function-associated antigen 1

1193 ***John B. Roths, Abigail L. Smith, and Charles L. Sidman.*** Lethal exacerbation of *Pneumocystis carinii* pneumonia in severe combined immunodeficiency mice after infection by pneumonia virus of mice

1199 ***Roberto Manetti, Paola Parronchi, Maria Grazia Giudizi, Marie-Pierre Piccinni, Enrico Maggi, Giorgio Trinchieri, and Sergio Romagnani.*** Natural killer cell stimulatory factor (interleukin 12 [IL-12]) induces T helper type 1 (Th1)-specific immune responses and inhibits the development of IL-4-producing Th cells

1205 ***Maureen Howard, Tony Muchamuel, Silvia Andrade, and Satish Menon.*** Interleukin 10 protects mice from lethal endotoxemia

1209 ***Peter Lane, Thomas Brocker, Sabine Hubele, Elizabetta Padovan, Antonio Lanzavecchia, and Fiona McConnell.*** Soluble CD40 ligand can replace the normal T cell–derived CD40 ligand signal to B cells in T cell–dependent activation

1215 ***Ann-Christine Lalmanach-Girard, Thomas C. Chiles, David C. Parker, and Thomas L. Rothstein.*** T cell–dependent induction of NF-κB in B cells

1221 ***Micha J. Rapoport, Alan H. Lazarus, Andrés Jaramillo, Edwin Speck, and Terry L. Delovitch.*** Thymic T cell anergy in autoimmune nonobese diabetic mice is mediated by deficient T cell receptor regulation of the pathway of $p21^{ras}$ activation

1227 ***Correction***

Volume 177 No. 5 May 1, 1993

1231 ***Shuichi Ikeyama, Masaru Koyama, Masuo Yamaoko, Reiko Sasada, and Masayuki Miyake.*** Suppression of cell motility and metastasis by transfection with human motility-related protein (MRP-1/CD9) DNA

1239 ***José Angel Gonzalo, Ana González-García, Carlos Martínez-A., and Guido Kroemer.*** Glucocorticoid-mediated control of the activation and clonal deletion of peripheral T cells in vivo

1247 ***Pedro Romero, Jean-Laurent Casanova, Jean-Charles Cerottini, Janet L. Maryanski, and Immanuel F. Luescher.*** Differential T cell receptor photoaffinity labeling among H-$2K^d$ restricted cytotoxic T lymphocyte clones specific for a photoreactive peptide derivative. Labeling of the α-chain correlates with Jα segment usage

1257 ***Ralf C. Bargou, Markus Y. Mapara, Christian Zugck, Peter T. Daniel, Michael Pawlita, Hartmut Döhner, and Bernd Dörken.*** Characterization of a novel Hodgkin cell line, HD-MyZ, with myelomonocytic features mimicking Hodgkin's disease in severe combined immunodeficient mice

1269 ***Edward W. Greeno, Patrick Mantyh, Gregory M. Vercellotti, and Charles F. Moldow.*** Functional neurokinin 1 receptors for substance P are expressed by human vascular endothelium

1277 ***Fabienne Mackay, Hansruedi Loetscher, Dietrich Stueber, Gisela Gehr, and Werner Lesslauer.*** Tumor necrosis factor α (TNF-α)-induced cell adhesion to human endothelial cells is under dominant control of one TNF receptor type, TNF-R55

1287 ***Ute Frevert, Photini Sinnis, Carla Cerami, Wayne Shreffler, Bela Takacs, and Victor Nussenzweig.*** Malaria circumsporozoite protein binds to heparan sulfate proteoglycans associated with the surface membrane of hepatocytes

1299 ***L. M. Liu and G. G. MacPherson.*** Antigen acquisition by dendritic cells: intestinal dendritic cells acquire antigen administered orally and can prime naive T cells in vivo

1309 ***Peter W. Mathieson, Sathia Thiru, and David B. G. Oliveira.*** Regulatory role of $OX22^{high}$ T cells in mercury-induced autoimmunity in the Brown Norway rat

1317 ***Carmen A. Medina and Judy M. Teale.*** Restricted κ chain expression in early ontogeny: biased utilization of V_κ exons and preferential V_κ-J_κ recombinations

1331 ***William Craig, Robert Kay, Robert L. Cutler, and Peter M. Lansdorp.*** Expression of Thy-1 on human hematopoietic progenitor cells

1343 ***Michele D. Blum, Gwendolyn T. Wong, Kay M. Higgins, Mary Jean Sunshine, and Elizabeth Lacy.*** Reconstitution of the subclass-specific expression of CD4 in thymocytes and peripheral T cells of transgenic mice: identification of a human CD4 enhancer

1359 ***Gary A. Waanders, Alexander N. Shakhov, Werner Held, Ochine Karapetian, Hans Acha-Orbea, and H. Robson MacDonald.*** Peripheral T cell activation and deletion induced by transfer of lymphocyte subsets expressing endogenous mouse mammary tumor virus

1367 ***Chandra Mohan, Sharlene Adams, Valerie Stanik, and Syamal K. Datta.*** Nucleosome: a major immunogen for pathogenic autoantibody-inducing T cells of lupus

1383 ***Véronique Kruys, Patricia Thompson, and Bruce Beutler.*** Extinction of the tumor necrosis factor locus, and of genes encoding the lipopolysaccharide signaling pathway

1391 ***Peter Orosz, Bernd Echtenacher, Werner Falk, Josef Rüschoff, Dorothea Weber, and Daniela N. Männel.*** Enhancement of experimental metastasis by tumor necrosis factor

1399 ***Yasuhiko Makino, Nobuyuki Yamagata, Takahisa Sasho, Yoshihiro Adachi, Rieko Kanno, Haruhiko Koseki, Masamoto Kanno, and Masaru Taniguchi.*** Extrathymic development of Vα14-positive T cells

1409 ***Isabelle A. Rooney, John P. Atkinson, Elaine S. Krul, Gustav Schonfeld, Kenneth Polakoski, Jeffrey E. Saffitz, and B. Paul Morgan.*** Physiologic relevance of the membrane attack complex inhibitory protein CD59 in human seminal plasma: CD59 is present on extracellular organelles (prostasomes), binds cell membranes, and inhibits complement-mediated lysis

1421 ***Ji-Liang Gao, Douglas B. Kuhns, H. Lee Tiffany, David McDermott, Xu Li, Uta Francke, and Philip M. Murphy.*** Structure and functional expression of the human macrophage inflammatory protein 1α/RANTES receptor

1429 ***Ilona Kariv, Richard R. Hardy, and Kyoko Hayakawa.*** Selective enrichment of major histocompatibility complex class II–specific autoreactive T cells in the thymic Thy0 subset

1439 ***Antonio R. N. Arulanandam, Philippe Moingeon, Michael F. Concino, Michael A. Recny, Kazunori Kato, Hideo Yagita, Shigeo Koyasu, and Ellis L. Reinherz.*** A soluble multimeric recombinant CD2 protein identifies CD48 as a low affinity ligand for human CD2: divergence of CD2 ligands during the evolution of humans and mice

1451 ***Lori-ann E. Minasi, Yumiko Kamogawa, Simon Carding, Kim Bottomly, and Richard A. Flavell.*** The selective ablation of interleukin 2–producing cells isolated from transgenic mice

1461 ***Jean-Charles Guéry, Monica Neagu, Gemma Rodriguez-Tarduchy, and Luciano Adorini.*** Selective immunosuppression by administration of major histocompatibility complex class II–binding peptides. II. Preventive inhibition of primary and secondary in vivo antibody responses

Brief Definitive Reports

1469 ***Kristin A. Hogquist, Marc A. Gavin, and Michael J. Bevan.*** Positive selection of $CD8^+$ T cells induced by major histocompatibility complex binding peptides in fetal thymic organ culture

1475 ***Theodora W. Salcedo, Tomohiro Kurosaki, Palanisamy Kanakaraj, Jeffrey V. Ravetch, and Bice Perussia.*** Physical and functional association of $p56^{lck}$ with FcγRIIIA (CD16) in natural killer cells
